## **Environmental Solutions, Inc. Surpasses E2 Goal**

Environmental Solutions, Inc. (ESI) is pleased to announce they have surpassed the goal set as part of the Virginia Environmental Excellence Program (VEEP) Environmental Excellence (E2) level. As part of their E2 status, ESI set a goal to reduce electricity usage at the Patterson Avenue headquarters location by 10%. "I am pleased to report that our 2007 Report to the Virginia Department of Environmental Quality (DEQ) for 2006 will show a 16% reduction in electricity usage. This translates into an approximate savings of \$1200.00 for the year," stated Harry Gregori, ESI's Vice President.

Efforts will be stepped up for 2007 to include further electricity usage reduction, as well as paper recycling efforts. Mr. Gregori further said, "Tons of paper makes its way to the landfill each day, whether it is office paper, newspaper, or magazines. We are making it easy for employees to do their part by having a simple paper recycling box placed in each office and in each copier room. Contents of the boxes will be collected and weighed on a periodic basis. Employees are also encouraged to bring paper, as well as plastics and aluminum from home if they do not currently have a community recycling program. I believe it is imperative that each and every organization establish an ongoing recycling program as part of their environmental (and economic) stewardship."

The Virginia Environmental Excellence Program (VEEP) encourages superior performance through environmental management systems and pollution prevention. Any Virginia facility that impacts the environment through its operations, activities, processes, location, etc., is eligible to participate in VEEP. This includes, but is not limited to: manufacturers, commercial establishments, federal / state / local government agencies, schools, non-governmental organizations, and small businesses. Facilities achieving the E2 status are eligible for a number of benefits, including technical assistance for the development and implementation of an environmental management system and pollution prevention program. Other incentives include positive public recognition, possible reductions in annual permit fees, and a single point of contact within DEQ.

About ESI: Since 1990, Environmental Solutions, Inc. (ESI) has dedicated itself to providing environmental solutions integrating innovative processes, state of the art technology, and economics. ESI offers training and consulting, as well as, project development and management, using the Environmental Management Systems (EMS) principals. In addition, the company markets green products created as a result of projects managed by ESI. Environmental Solutions, Inc. is a closely-held, woman-owned business headquartered in Richmond, Virginia. ESI's President, Brenda Robinson, has more than 15 years of experience in a Fortune 500 company and more than fifteen years experience with technology-based businesses and co-founded ESI with her late husband, W. W. "Phil" Robinson. ESI's solutions are applicable, successful, and repeatable, working within your unique organizational requirements. For additional information on how ESI can assist your organization in turning waste (by-products) from a liability into an opportunity, visit us online at [www.envirsol.com](http://www.envirsol.com) or call 804.740.5605.
